RATIONALE

The Social Studies Curriculum focuses on the study of man, his interpersonal relationships and his interactions with the cultural, physical and social environment. Therefore, it deals with his origins, historical development and systems of government. It selects relevant concepts and skills from a variety of disciplines. Social Studies brings a unique way of Organizing content to enable the child to construct meaning of his social, cultural and physical world and so permits the adoption of a child-centered approach to teaching and learning. This curriculum provides an excellent forum for the infusion of values education and social and emotional learning. Every effort must be made to help students to be aware of and to accept and develop values such as tolerance, respect, honesty, cooperation and empathy.

The adoption of an integrated approach to the curriculum enables students to see a „wholeness“ about their learning in the classroom. A variety of strategies should be used to provide self-directed, integrated learning experiences. This syllabus provides a framework for the development of citizenship education through which students can make meaningful contributions to their community, the region and the world.

GENERAL OBJECTIVES

- To develop good citizens
- To develop an appreciation for our culture and national heritage
- To enable students to develop good interpersonal skills
- To inculcate attitudes and habits which enable students to conserve and preserve natural resources.
- To engender a spirit of cooperation and unity among our students.

FORMAT OF THE SYLLABUS

The Social Studies Curriculum is divided into a Scope and Sequence, Attainment Targets and a detailed syllabus outline. In the Scope and Sequence and Attainment Targets when a concept/skill is first introduced it is indicated by a ■. A ✓ indicates in which future class (es) the concept/skill has to be developed and maintained.

The Scope and Sequence gives a brief outline of the topics that are to be covered at each level. The Attainment Targets indicate the skills and competencies, which each student should be able to achieve by the end of each academic year. The Specific Objectives are clearly outlined and indicate what each student should be able to achieve at the end of this level.

The Suggested Activities are designed to facilitate the development of social and emotional learning skills, decision-making skills and critical and creative thinking. They foster cooperative and collaborative learning in the classroom, while consolidating instructions and developing desired skills. These activities are intended only as a guide to teachers and are by no means prescriptive nor restrictive.

Since assessment is an essential part of any educational programme, an Assessment section with a wide range of methods is included for each topic.
